

A Powerful Tool for Oral Health

Mouthwash is an important part of any oral hygiene routine. It can help to freshen breath, kill bacteria, and prevent tooth decay and gum disease.

By choosing the right type of mouthwash and using it correctly, you can enjoy a healthier, happier mouth for years to come.

How to use it?

Mouthwash can be used anytime but is most effective if you thoroughly brush and floss your teeth first.

Simply hold a small amount in your mouth, swish it around, and spit it out.

In order to get the maximum benefit from mouthwash, avoid eating, drinking, or smoking for at least 30 minutes after rinsing.

Children under six years of age should not use mouthwash as their swallowing reflex is not yet sufficiently developed.

Mouthwash

Unleash your happy
breath

Product contain:-

Anti-Microbial agent

found very effective in preventing and reducing plaque-induced gingivitis by acting against oral bacteria

Cooling agent

It gives a strong, minty flavor and makes your mouth tingly and cold.

Mineral supplement

It works by strengthening the teeth and reducing the effects of acid and bacteria on the teeth. This makes them resistant to decay

Select the one you need

(A) Gum Care

It was tested for its ability to prevent plaque and gingivitis formation.

Thymol protects against tooth decay and infections, and it was discovered that thymol-containing mouthwash was effective in preventing the onset of dental caries, a pathological process in which microorganisms destroy tooth structure.

Select the one you need

(B) Total Care

With Bisabolol natural, a natural ingredient derived from chamomile that has been shown to have a variety of benefits for oral health.

Bisabolol can help to improve overall oral health and prevent further problems by reducing inflammation and soothing the gums.

(C) Fresher Breath

It has a fresh mint-like smell and a spicy, cooling taste with the addition of Eucalyptol.

This product's main purpose is to help you get rid of bad breath. It may provide you with a sense of relief and increased confidence in social situations.
